

commercial name: National Walnut

botanical name: junglas regia

[widgetkit id=27]

DESCRIPTION

It has a dark brown colour with a medium weaving and a varied fibre. The shrink is medium so as its nervousness its durably and flexibility, while the hardness and workmanship are good. The wood must be glued with glue containing a small quantity of water or with rapid glue. painting has good success. In order to give elegance and colour, the national walnut must be evaporated. Thi process gives the wood a more uniform colouring and helps to prevent and to evade the attack of woodworms and of moulds..
